

Plan S : A Survival Guide for Societies and Associations

There is a great deal of information about **Plan S**, increasingly so, as details unfold. While much information is still to come about implementation, it is generally agreed that learned societies especially will be affected. **Maverick** has developed a tool to help societies assess their risk and prepare to the extent possible to minimize the impact on revenue, work flow, and the scholarly publishing process.

It covers the following areas:

- Test your Vulnerability: Features of your journal program
- What are your subscription business models and revenue?
- Do you now publish OA?
- Is your platform **Plan S** compliant?
- Is your repository or preprint server **Plan S** compliant?
- What are the components of a transformative agreement?
- What other types of agreements are available?
- What can you do to prepare for **Plan S**?

We provide an individualized assessment, based on your program, to help you focus on what is important. Let the **Maverick team** work for you.
