

Open Access Assessment Program

As the open access (OA) movement in scholarly publishing continues to evolve, new challenges and opportunities have emerged. Maverick monitors OA issues so we can help our clients understand and prepare for them, avoiding risks, assessing implications, and identifying future directions. The following are some aspects of our OA assessment program, which can be tailored to your needs.

OA Evaluation

- How resilient are you to new OA requirements?
- Do you have the potential to flip from subscription to OA or start a new OA journal?
- Is your current model sustainable?
- Are your APC charges and waivers equitable?
- Would automation help your workflow and increase volume?

Funder Mandates

- The latest cOAlition S directives
- OSTP requirements and enactment
- Geographic considerations/variations
- Impact on your program

Business Models

- Subscribe to Open
- Transformative agreements
- Other emerging models
- Green, gold, platinum, diamond

Research Integrity

- Papermills
- Detecting plagiarism
- Illustration manipulation
- Managing special issues

Open Data

- Options for deposits
- The importance of metadata
- Repositories and preprints

Let Maverick's global network help keep your organization on track and on schedule with a full range of professional support services. Our unique structure allows us to assemble teams with the exact skills needed to support each project.
